

Talent2 learning solution

The Talent2 Curriculum and Project Portal is a fully web-enabled standardised (vanilla configuration) version of the well-established and utilised Talent2 Learning Management System (LMS). It offers much of the functionality and capability of this powerful enterprise level system at a fraction of the cost.

The system enables clients to access the generic Talent2 Learning Curriculum direct from their desktop, and can be used to manage and deliver online and instructor-led training projects through one integrated solution in a professional, secure and efficient manner.

The Solution

- > Branded learning portal
- > Virtual training department
- > Instant learning catalogue
- > Customised catalogue

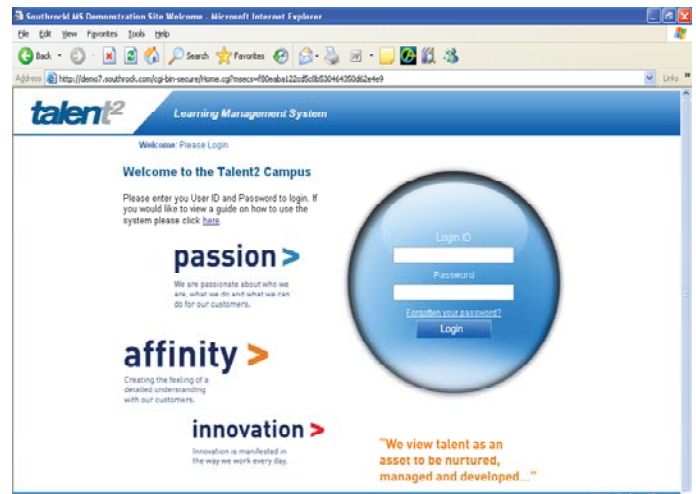

Talent2 provides a range of learning technology and outsourced learning services to organisations throughout the Asia Pacific region.

The Talent2 Learning Package

Your Own Branded Learning Portal

- > Ability to brand your login page, and link it to your intranet.
- > Branded portal is fully web-enabled and accessible via standard web browsers from either the office or at home.
- > Data is fully secure, with access limited to Talent2 administrators and client staff with appropriate logins.
- > Vanilla configuration using all the standard capability. The system configuration includes access to the sophisticated training plan, assessment, tutor and reporting functionalities to ensure that enterprise level results are available to smaller organisations and stand-alone projects.

An instant training department that looks and feels like your own

Talent2 learning solution

Your Own Virtual Training Department

- > Get access to the same calibre of training consultants, coordinators and system administrators as enjoyed by many companies in the ASX 100.
- > Access to online courses and registration onto workshops for project-based training is coordinated and administered by Talent2 Managed Learning Services team who specialise in learning project deployment.

Instant Access to a Quality Learning Catalogue

- > A full suite of courses are available direct through the portal, and all the decision making and organisation behind the scenes has already been done. Courses are available on a pay-per-use basis to avoid upfront fees and overheads. This catalogue will cover most of your generic requirements.
- > **Workshop Catalogue** – a full suite of courses, from frontline leadership to sales and customer service. Talent2 has created a core catalogue of programmes, with access to over 200 facilitators across Australia.
- > **eLearning Catalogue** – online courses in basic, intermediate and advanced level desktop and PC skills.

- > **Public Courses** – our administrators can take care of sourcing and managing registrations for public courses in a range of core programmes using our preferred suppliers and the broader market.
- > **Training History Data** – you can also use this to provide a central database for storing all your training histories, accreditation and qualification management, tracking and alerts to maintain compliance.

Ability to Add Your Own Customised Training

- > **Your online courses** – ability to load any courses you have created specific to your own business. These can be compatible eLearning courses, self-study learning, surveys and assessments.
- > **Your face to face courses** – you can get our learning coordinators to upload and take care of all the administration for managing your facilitated workshops and learning activities you are running within your business – including finding appropriate facilitators and providers if you have not already selected a provider.
